

Rainbow Flavored Otters Knots is the first Tyme fan album. The talented super surrealist, Is / Isn't (Robert Montilla) in a fit of insanity and lucidity zealously, inspired by the incomprehensible writings of Justynnn Tyme dramatized his first publication a collection of difficult and highly complex pieces in its entirety. The publication has since been split into two separate and expanded collections *Rainbow Flavored Otter Nuts* (2018) and *Doggo Dada Ganoush* (2018).
